

Concussion Care: Baseline Testing Program

What is a Concussion?

An impact to the head or body causing a significant amount of force to be absorbed by the brain, resulting in concussion symptoms.

NCT's Baseline Concussion Testing Program

Beginning of the season

- Concussion education
- Physical & cognitive Baseline Assessment

In the event of a concussion

- Access to Neurology, Occupational Therapy & Physiotherapy appointments within 1 week

When ready to return to play

- Repeat Baseline Assessment
- Results compared to pre-injury measures to help inform return to play decision

Benefits of Baseline Concussion Testing at NCT

- Sooner access to treatment
- Faster concussion recovery
- Safer & more effective return to play
